

At this years World Service Conference the issue of making certain changes in our basic text again came to the floor. It seems we almost repeated a controversy mistake of the past. The participants of this years conference should be commended for recognizing the potential problems of the issue and responding appropriately. I hope, for our sake, that this includes those who drafted the motion and brought it to the floor. Apart from the issue of making changes in our basic text and the appropriate procedure for doing this; the questions raised by the content of the proposed changes are of extreme importance. They are fundamental concepts about the nature and function of Narcotics Anonymous and our services. I hope that we will not take this matter lightly and make any hasty decisions which we may later regret.

as an alternative to these changes I would recommend ~~either~~
a major reorganization of our World Service structure eliminating
both our WSB and WSO as they exist today and replacing them

without WSB
WSO + WSC
are always
at conflict
and stalemate
