

WORLD DIRECTORY

OF N.A. MEETINGS

VOLUME I

WORLD SERVICE OFFICE, Inc. NARCOTICS ANONYMOUS

16155 Wyandotte Street
Van Nuys, CA 91406 (818) 780-3951

February 1985

TO THE FELLOWSHIP AND FRIENDS:

This Directory of Narcotics Anonymous meetings has been prepared from information received at the World Service Office. It is only as accurate as the information we receive, and we request that any information that is incorrect be brought to our attention by sending a letter or note.

The 1985 edition of the World Directory includes corrections about information on meetings that had been found to be in error in the 1984 printing of the Directory. Corrections had also been printed in the quarterly updates printed during 1984, and sent to those who subscribed to the update service. We had anticipated that the original printing of the 1984 edition would require substantial correction, and we were right. Hopefully most of the information in this edition is accurate and will not require the volume or frequency of corrections needed for the 1984 edition. Accordingly only one update is planned for this edition.

Because only one update is planned for each volume of the 1985 edition, there will not be a subscription service for this edition. The update will be sent automatically after its printing, to every purchaser of a volume of the 1985 edition of the World Directory. The update is scheduled to be distributed in August 1985. The deadline for receipt of information for the update is as follows: For new meetings, February 15, 1985; for changes of information to existing listings (closed meetings, changes of time, date, place or meeting type) is June 1, 1985.

This edition of the Directory is divided into three separate volumes based on a geographical division of the Fellowship. Those meetings in the United States appear in two sections with a third volume for the rest of the Fellowship. The division of the Directory in this way has been done as a convenience to users. Most users have clearly indicated that although information about meetings in distant places is interesting, it is seldom or never used.

Contained in the three volumes of the 1985 edition of the Directory, is information on over 3,700 meetings. This represents an increase of over 1,500 meetings contained in the 1984 edition, after adjustment for meetings that were listed but had already been closed when the 1984 edition was distributed. The 1,500 new meetings represents a growth of 68 percent in the number of meetings since the cutoff date for information in the

1984 edition which was October 1, 1983. The fifteen months since that cutoff date reveals that approximately 100 new meetings start up each month. It is reasonable to expect that this growth pattern will continue indefinitely.

An effort has been made to verify telephone numbers for hotlines and contact persons that are shown for each state. Information that we were unable to verify has been omitted.

Extreme caution should be exercised in the use of information contained in this publication. The anonymity of members of the Fellowship must be preserved at all times. The loss of anonymity frequently has dire consequences for the person whose anonymity is lost. Please use these guidelines for the protection of those in service, whose anonymity may accidentally be compromised because their name or phone number is printed in this Directory. The Fellowship is in a period of rapid growth and these phone contacts may frequently be the home phone of a member. After a few years most if not all areas will be covered by local hotlines that are not an individual's personal phone. In the interim, we must provide protection for those willing servants.

Before any phone number shown in this Directory is sent to any media outlet (radio, T.V., newspaper or magazine) or in any other way distributed or made known to the general public, the person or committee who answers the phone should be contacted and their consent obtained. Information about the meetings, their time, date, location, etc., should not be publicized outside the Fellowship, on radio, T.V., newspapers or magazines without prior consent of the group that conducts the meeting. These types of public information efforts should always be coordinated and approved by area or regional public information committees.

Some meetings are restricted in some manner by the owner or operators of the facility in which the meeting is being held. These are usually Hospital and Institution meetings. In many cases this information is shown in the Directory. For those meetings that have some restriction and the information about the restriction is provided, please check with the group holding the meeting or the institution before attempting to attend the meeting. This can frequently be achieved through the hotlines shown for the appropriate city or state.

The accurate publication of the Directory has resulted in many addicts attending meetings in places they visit that they might not have otherwise known about. This has resulted in many letters about customs discovered in one area that are different from those in another. Sometimes the letters about these differences have revealed actions that are contrary to the Twelve Traditions. Every effort should be made to resolve these situations within the group sponsoring the meeting. If resolution cannot be achieved, the Service Manual should be consulted for appropriate procedures to follow.

This year marks the thirty-second year that Narcotics Anonymous has been in existence. From the first meeting in 1953,

and a few addicts who believed they could remain free from drugs, the Fellowship of Narcotics Anonymous has grown to a Fellowship of tens of thousands.

The first meetings may have lacked the finesse and structure our current meetings have, but they helped keep participants from using. In the early years, the Fellowship grew slowly and went through the growing pains of personalities and differing opinions of direction and philosophy. But by working the Twelve Steps and following the Traditions, stability in the organization and gradual growth resulted.

Acceptance of Narcotics Anonymous as an alternative way to avoid drug use was not achieved overnight. It took years of hard work and patience to overcome the barriers of suspicion, intolerance, and fear. By the late 1960's, N.A. began to achieve recognition and take a more permanent shape.

By the mid 1970's, the format of meetings and the structure we currently recognize were serving a fellowship that extended across the country and had members in remote places around the globe. Today, Narcotics Anonymous is a rapidly growing Fellowship with a strong presence in each Dominion of Canada, every State of the United States, and in sixteen other nations. Public and private agencies, governmental institutions and hospitals are flooding the Fellowship for requests for literature, books, advice and assistance in bringing recovery to thousands of people around the world.

Narcotics Anonymous will continue to expand as more addicts discover that recovery can be found in working the Twelve Steps and Traditions of the N.A. Program. This Directory of meetings is a testament to the growth and stability of N.A. There are over 3,700 separate meetings listed and more are being started every day.

Use this Directory well and often as the lives of addicts depend on getting the message of recovery to those who still suffer.
