Re: First Report, Conference 1990 - 1991

The WSC Literature Committee met this morning to review our priorities for the year and to plan our work. We discussed committee ad hoc groups on the Steps, *For Those in Treatment*, and *In Times of Illness*. The committee also reviewed work of the daily book working group. We committed this project as our highest non-A-list priority.

Another priority for the committee this year is our relationship with N.A. literature committees in non-English speaking regions. A number of issues were discussed including our ability to be responsible to their needs by mailing material to them early and extending their final deadlines.

The committee is excited about our ability to move forward in our development of the steps portion of *It Works: How and Why*. Thank you for your support.
