Re: Archives Update

The WSO has made a great deal of progress cataloguing the items we purchased in March, 1997, from the James P. Kinnon estate. Attachment #2 represents a partial listing of the individual items we have catalogued to date. The listing contains over 500 items. (We will not be in a position to distribute or provide copies of these items any time soon or until we have sufficient resources to devote to that type of service.)

There are several other issues we wish to discuss with you besides the actual inventory of items. As we informed you of at the WSC we intended to take great care in properly inventorying and protecting the items. Some of which required significant attention. Presently, the expense for cataloguing the items has fallen to the WSO as a non-budgeted line item in the WSO's 1997 budget. We expect the cost to complete the inventorying, cataloguing, and item protection to be approximately \$30,000. This however, will not include the re-mastering of approximately 300 audio tapes containing historical discussions and other important information and their cataloguing. This work may be considered for the 1998 WSO budget.

The WSO board is now considering several product ideas, some of which came from WSC participants, using material from the archives. These include a proposal to produce a coffee table book of historical items and a compilation of Jimmy Kinnon's writings. The board will consider these proposals at their October meeting so if you have input please provide it to them before their meeting.

We have not made any long term plans for the archives. In the short term we want to finish processing the Kinnon material, then request additional materials from several other long term members, who have indicated their willingness to give the material to the WSO and then make an overall assessment about how best the material can be utilized and provided to our members.

**INTERIM COMMITTEE REPORT**

**Archive Purchase From the James P. Kinnon Estate**

In late January 1997, George Hollahan, one of the WSO Executive Codirectors received a call from an agent representing the estate of James (Jimmy) P. Kinnon. (Jimmy was a founding member of the fellowship and served for many years as a member of the board of trustees and as the manager of the WSO.) The call was a confidential inquiry regarding our interest in the purchase of archive material owned by the estate relating to the early history of the fellowship. The agent also informed us that there was at least one other party actively interested in pursuing the purchase of the material. We responded that we were very interested and that before negotiations could go any further the three world service chairpersons would have to be informed and would have to authorize further negotiations.

After several weeks of negotiations and a cursory inspection of the material by WSO, a proposal was brought to the full Interim Committee. The proposal included securing all the ownership rights and copyrights to the written and audio material contained in approximately five filing cabinets, ten moving boxes, and twenty boxes of audio material, for a purchase price of \$50,000.00.

Many things were considered during the discussion of the proposal, but when all was said and done we agreed unanimously to pursue the agreement and purchase of the material. On March 31, 1997 the agreement was consummated and WSO took possession of the materials. Payment was made from WSC funds.

The material is now being catalogued and inventoried by the WSO which we expect will take three to four months. You will see some of it on display during the WSO open house later this afternoon. We hope that you will be excited as we are that this material in combination with the donations we have and will receive from other early NA members, that our fellowship will have the ability to paint the full picture of the history and development of Narcotics Anonymous.
